

Cattleya mossiae is the queen of Venezuelan Cattleya's. Once the most popular corsage flowers for Mothers day, it is now rarely seen in collections and cut flower trade. See the magnificent pictures of C. mossiae in the wild presented in PowerPoint presentation. Learn about it habitat and the perils that await the future for the queen of Venezuelan Cattleya's.

Fred Clarke has been growing orchids for 30 years and has been hybridizing for 20 of those years. With over 23 years as a professional grower and manager in the horticultural industry, Fred applies these skills at his orchid nursery; Sunset Valley Orchids, located in San Diego, California.

He is a passionate orchid grower whose curiosity in orchids is broad and varied. Although developing Cattleya hybrids has been his sustaining interest, he is also actively creating new Bulbophyllum and Paphiopedilum hybrids.

His pioneering work in Catasetum intergeneric hybrids led to the development of several notable hybrids, most recently the grex, Fredclarkeara After Dark, which produced "the **blackest** flower ever witnessed". This grex has received five FCC's and three AM's on the first flowers shown for judging!

Fred is an Accredited Judge in the Pacific South Judging Region. His plants have received hundreds of quality awards from the American Orchid Society.
