

Multifloral Paphiopedilums with Parvi and Brachy influence

A review of the influential species, primary and advanced hybrids of this amazing group. This talk is a summary of the current breeding trends using the Brachypetalum and Parvisepalum species with multifloral paphs. A PowerPoint presentation

Bio for above talk:

See the current trends and stunning effect of the Parvisepalum and Brachypetalum species on multifloral Paphiopedilums. This is a PowerPoint presentation.

Fred Clarke has been growing orchids for 30 years and has been hybridizing for 20 of those years. With over 23 years as a professional grower and manager in the horticultural industry, Fred applies these skills at his orchid nursery; Sunset Valley Orchids, located in San Diego, California.

He is a passionate orchid grower whose curiosity in orchids is broad and varied. Although developing Cattleya hybrids has been his sustaining interest, he is also actively creating new Bulbophyllum and Paphiopedilum hybrids.

His pioneering work in Cattleya intergeneric hybrids led to the development of several notable hybrids, most recently the grex, Fredclarkeara After Dark, which produced "the **blackest** flower ever witnessed". This grex has received seven FCC's and four AM's on the first flowers shown for judging!

Fred is an Accredited Judge in the Pacific South Judging Region. His plants have received hundreds of quality awards from the American Orchid Society.
